Update on Foreman Street Repairs

On August 29, 2019, the Town Council of Jackson voted to award the bid to repair the road and replace a section of water line on Foreman Street. We will also be installing additional valves and a fire hydrant during the construction.

Thank you for being patient on these repairs, especially to the homeowners on Third Street Extension. The Town had to get approved plans from our Engineer on our plan of action. After approval from the South Carolina Department of Transportation, the Town opened the job for bids. We received the bids, reviewed them, and selected a contractor on August 29th.

ATC Site Construction, LLC of North Augusta was awarded the contract. We have used ATC before on several projects and are pleased with their past work. They have agreed to start work in September and the project should be completed within 30 days of start date.

Again, thank you for your patience.

Mayor Etheredge and Council
